Research and Development

Our R&D team is comprised of experts in circuit and outward appearance design. With the emphasis on developing new features and improving performance, the R&D team is responsible for new materials usage and production facilities. We always follow the market trends to achieve customers' requirement, and we are able to release new models every month.

Quality Control

Quality control process

To ensure excellent quality levels, we have implemented a QC system to ensure that all

products are strictly monitored and tested at each stage of production process, with defective items removed and disposed of, to ensure 100% satisfaction to our customers.

About QC department

We perform strict QC measures according to our customers' standards. Our QC system includes QC, IQC, IPQC, QE and QA. The QC staff are experienced and equipped with advanced machinery. In addition, the R&D department provides technical support throughout the entire production process.

Besides carefully monitoring the quality of our products at every single stage of production from material and components to finished products, our QC people carry out spot checks right before delivery. Every effort we make is in order to ensure that our customers receive perfect products.

"Customer comes first," reminds us that quality is of key importance to providing customer satisfaction. To achieve that motto, we devote ourselves production and quality control. We believe through our efforts customers are sure to get 100% quality guaranteed products.
